Steel Hangar Solutions

Do you need a steel hangar to store your products under specific conditions? Dem Steel's distinctive steel building system can be tailored to align with your specific requirements. Our modular system can adapt to meet your evolving needs as your business expands. Dem Steel is equipped with the expertise and experience to oversee your construction project from start to finish.

For fast, flexible,
sustainable solutions;
Dem Steel

Our steel hangars are crafted with premium materials to ensure durability and reliability for your long-term storage needs. These environmentally friendly solutions are produced sustainably and feature a galvanized coating that requires minimal maintenance. Additionally, they provide a cost advantage of 20-25% compared to conventional steel structures.

We are pleased to offer trusses with free spans of up to 35 meters, tailored to the specific requirements of your projects. This solution is ideal for a variety of projects and increases design freedom.

These features make Dem Steel steel sheds an economical, durable, and flexible solution.

Dem Steel offers a comprehensive range of high-quality steel hangars to meet the needs of its customers. The hangar solutions we offer are designed to meet your expectations for use in your workplaces or workshops. You have the flexibility to determine your overall storage interior design and flow. In addition to safeguarding your inventory and production equipment, our hangars provide a productive and comfortable work environment for your employees and suppliers.

Each part is designed, customized and controlled to meet your demanding needs. Our team of experts designs, builds and manufactures the most suitable products for you in our own factory. We transport and assemble our hangars in close cooperation with our customers, partners and contractors worldwide.

Dem Steel manufactures and assembles multipurpose modular steel hangars that can be customized to suit your specific requirements. We can integrate all the necessary components for your business activities into your steel hangar. Our offerings include a solid structure, floors, walls, and a roof, as well as options such as easy access, a solid finish, and the addition of an office space on a mezzanine floor. All of this is achieved without the need for extensive foundation work, using only the highest quality materials, and at a competitive price point.

In line with the program and budget, thanks to our technical expertise and well-organized work process, the steel hangars you need are completed much faster than you might expect.

QUICK SETUP

With an experienced team and modular design, Dem Steel steel structures are quickly installed with minimal disruption to your business.

MODULAR DESIGN

Our steel hangars are modular, which means they can be customized and expanded to suit the needs of your business.

SAFE

Dem Steel uses robust and durable materials to ensure a safe working environment. Every detail is carefully designed and manufactured to meet maximum safety standards. All components are bolted, preventing a manufacturing error that may be overlooked in the field.

SUSTAINABLE

We follow sustainability principles in our production process. By using environmentally friendly materials and keeping waste to a minimum, our steel hangars offer a sustainable solution. All material is galvanized, eliminating the risk of chemical waste such as paint being left on site.

ROBUST

Dem Steel steel hangars are long-lasting and durable, built with high quality materials to meet the long-term needs of your business. Being galvanized, they reduce maintenance costs. They do not require blasting and painting in certain periods like traditional steel structures.

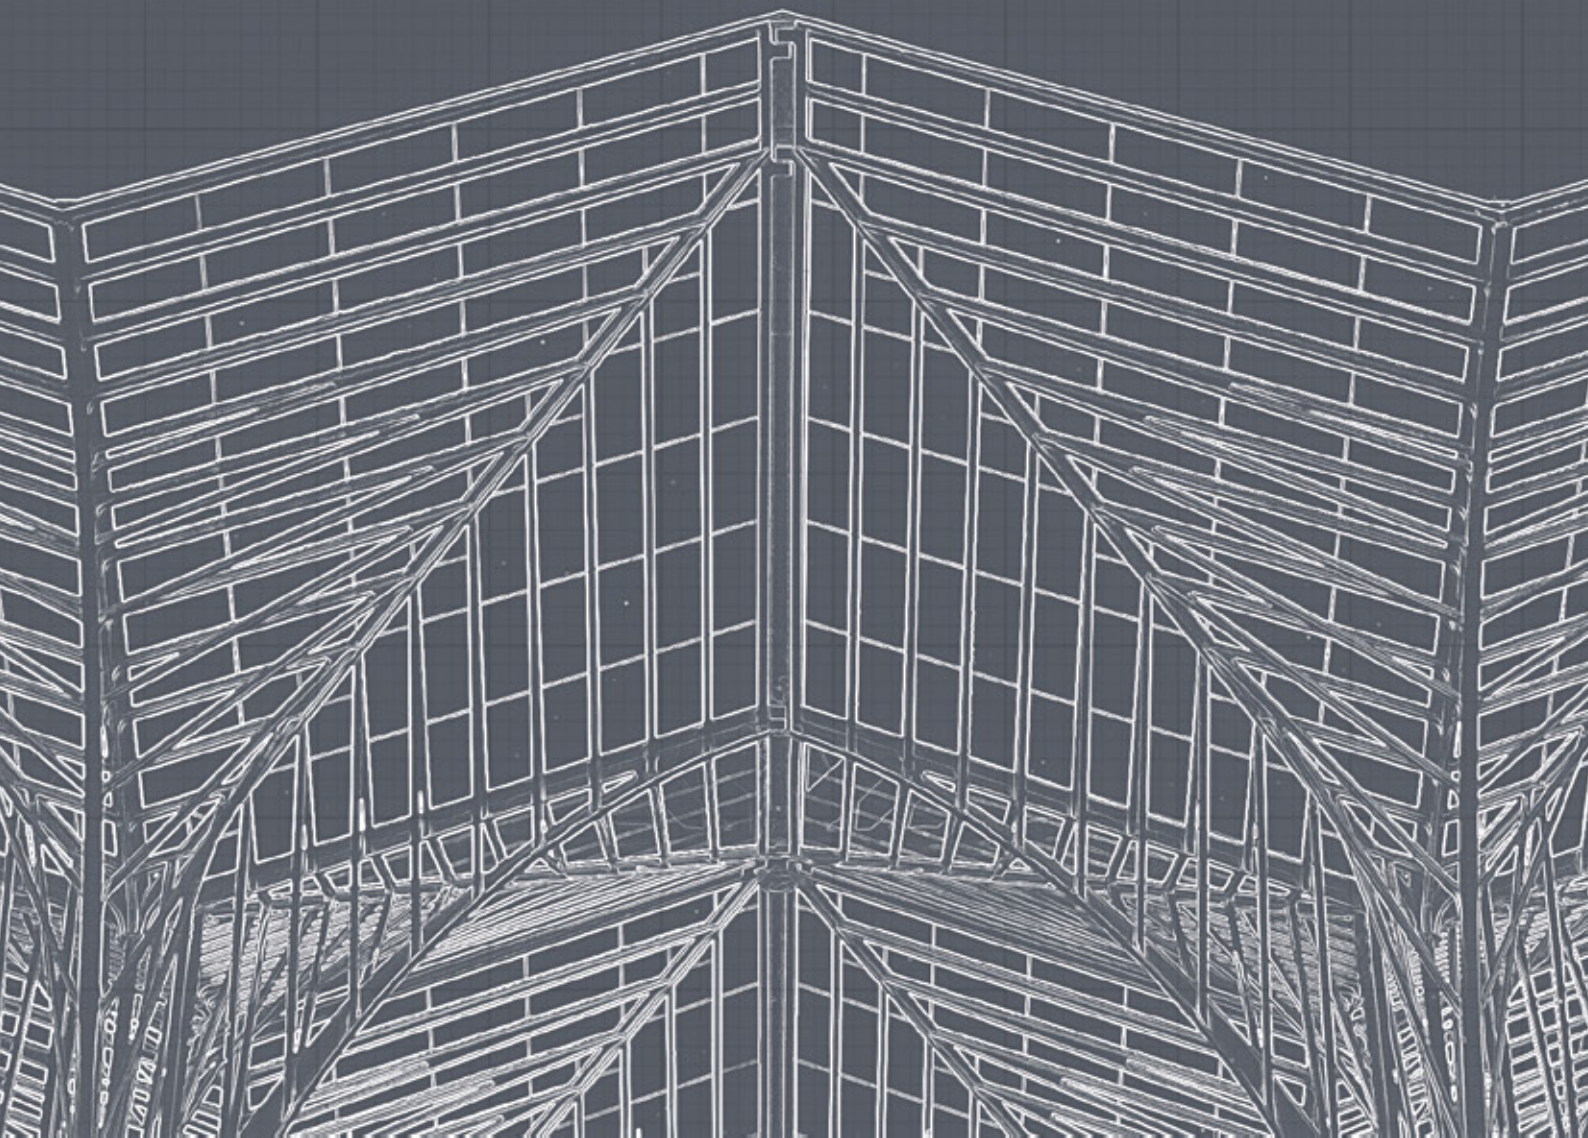

EXPERT TEAM

An experienced and specialized team supports you at every stage of your steel hangars. We offer a professional approach in design, production, installation and after sales services.

Our Projects

Dem Steel is a solution partner with a particular focus on steel structures. We are proud to offer quality products in collaboration with leading raw material suppliers in the sector. We place a high priority on customer satisfaction at every stage of the process, from assembly and disassembly to in-building installations, from painting to after-sales services. We remain one of the most significant players in the sector thanks to our robust structure and customer-centric approach.
